## Scientific Method in my Energy Experiment

**Question:** (What question were you trying to investigate?)

---

---

**Hypothesis:** (What did you think was going to happen?)

---

---

**Method:** (How did you test your question?)

---

---

---

---

---

---

**Observations/Results:** (What did you discover?)

---

---

---

---

---

---

**Conclusion:** (Was your hypothesis correct? Why do you think things turned out the way they did?)

---

---

---

**Further Questions:** (What other kinds of experiments could you do in the future related to this topic? What other questions would be interesting to ask?)

---

---

---
